EFI Color Profiler Suite

Vibrant Colour with Uncanny Precision

Choose the Right Integrated Solution to Deliver Precise Colour Quality

Fiery® Color Profiler Suite (CPS) gives you a competitive edge to produce high quality colour and meet tight customer turnaround times with integrated colour management tools that offer total colour quality control at every stage of the printing workflow. The comprehensive suite extends the capability of Fiery-driven® printers with the most advanced colour management tools available, ensuring that your colour reproduction is always accurate, consistent and reliable.

Key Colour Profiler Suite Benefits

Produces High Colour Quality

- Delivers optimum colour quality at every step of the workflow.
- Reproduces custom and spot colours accurately to meet the needs of your most demanding customers.
- Increases customer satisfaction with contractual proofing and printing capabilities that produce exact results.
- Extends the colour capabilities of Fiery-driven devices.

Achieves High Productivity

- Streamlines colour management tasks with integrated tools.
- Lowers your overhead costs by incorporating colour support into your existing workflows to eliminate delays, waste and errors.
- Produces accurate results in less time with automated colour management.
- Delivers a fully integrated colour workflow by communicating seamlessly with Fiery-driven devices.
- Provides Fiery users all tools at their fingertips to diagnose profile problems, compare gamuts, create and edit profiles without leaving Fiery Command WorkStation's interface*.

Delivers Great Return on Investment

- Minimises reprints and re-work.
- Makes learning the solution easy with automated tools and wizard-based workflows.
- Maximises your output devices with profiling capabilities, enabling you to do job splitting and proofing.
- Opens doors to new business opportunities due to amazing, industry-standard colour.

* Supported on Fiery Command WorkStation v5.3 and above.

Color Profiler Suite Modules

Color Profiler Suite offers a comprehensive toolset with all the benefits listed below.

Module	Description	Benefits
Printer Profiler	• Automates the profiling process and enables you to create custom ICC profiles for your printers. • Produces the most accurate and consistent colour across your output devices every time.	• Saves time by increasing your printers' accuracy. • Increases productivity through easy, automated tools.
Monitor Profiler	• Ensures that the colour on your screen accurately represents the colour of the final output. • Creates and calibrates ICC profiles for CRT, LCD and laptop displays; matches multiple monitors to a reference monitor and produces accurate soft proofs.	• Decreases printing costs by eliminating waste. • Shortens job preparation time. • Saves time by delivering accurate proofs.
Device Linker	• Delivers consistent colour in a controlled environment by building direct connections between the source and destination and produces fully compatible ICC profiles. • iO Scanning Table automation for profiling patch sets up to 1617 patch IT8.7/4. • Allows to open previously created iterative device link profiles for re-tuning the device link over time.	• Optimises productivity across printers while ensuring job consistency. • Decreases waste, lost time and revenue. • Increases your customer satisfaction by delivering superior colour quality.
Profile Editor	• Allows you to edit profiles automatically. • Makes global colour adjustments, such as changes to skin tones, memory colours, gray balance, node edits and white point, on all related jobs on an output device.	• Meets highest colour demands by being able to fine tune profiles in real time. • Saves time and money. • Frees your operators to do other tasks that increase your profits.
Profile Inspector	• Predicts colour rendering by comparing the input and output profiles of the devices and determining if there are any colours outside the colour capability of the printer. • Avoids profiling errors by previewing the profile to detect potential measurement issues.	• Increases your productivity. • Reduces errors and waste.
Color Verifier	• Enables you to measure and compare colour values of proofs and printouts against industry or in-house standards. • Provides a method to ensure consistency on a single device throughout the day, as well as across devices in remote locations.	• Ensures effective quality control. • Decreases approval time. • Works in local or remote locations, giving businesses more flexibility.

Color Profiler Suite Hardware	
ES-1000	The hand-held spectrophotometer, or measurement device, ensures that you achieve predictable colour every time. Simply set the device in its cradle and wait for the results of your colour patches. You also can do fast and precise calibration by connecting a USB cord to a Fiery controller.
X-Rite i1iO Scanning Table	The optional i1iO scanning table measures all colour patches simply and easily by mounting the ES-1000 on the automatic robotic arm of the scanning table. It helps to decrease the time spent creating device profiles and calibrating, by improving the accuracy and efficiency

EFI Color Profiler Suite

Product Configurations for Color Profiler Suite

Since every business has different requirements, Color Profiler Suite comes in three configurations to meet your needs now and in the future.

For more information on EFI Color Profiler Suite go to www.efi.com

EFI's portfolio of integrated solutions increases productivity and improves your bottom line. Find out more at www.efi.com.

Product Configuration	Target Audience
Fiery Color Profiler Suite Includes the ES-1000, with or without UV Filter, and CPS software.	For anyone who does not own or is looking for new profiling software or equipment.
Fiery Color Profiler Suite – Version Upgrade Includes the software to upgrade older versions of CPS to the latest release.	For any current users of older software versions.
Fiery Color Profiler Suite – Software Only Includes the full version of the CPS software.	For anyone who already owns an ES-1000 and wants to enable the software.
Optional i1 iO Automated Scanning Table	For anyone who wants to automate the repetitive task of measuring profile patches.

FREE Online Training Courses Included

You can quickly become a colour expert and start taking advantage of the powerful tools in Color Profiler Suite by taking the two interactive elearning courses included with the product.

- Introduction to Fiery Color Profiler Suite, 60 minutes duration
- Advanced Fiery Color Workflows Using Color Profiler Suite, 50 minutes duration

Buy Fiery Color Profiler Suite Today!

Don't miss another opportunity to get an edge over your competition. Produce the high colour quality that gets you and your customers noticed. To learn more, download the software demo at http://www.efi.com/cpsdownload.
