PRODUCTION PRINTING SOLUTIONS

Fiery Extended Applications

Productive. Powerful. Intuitive.

The Fiery® Extended Applications Package gives you complete functionality and control at your fingertips to manage, prepare and distribute your print and scan jobs from any Windows® and Mac® client for maximum productivity and outstanding results.

The Fiery Extended Applications Package gives you complete functionality and control at your fingertips. Now you can manage, prepare and distribute print and scan jobs from any Windows and Mac client for maximum productivity.

By installing the Fiery Extended Applications Package, you get the latest Fiery user software applications in one installation process, including:

- Fiery Command WorkStation® 5.5, the job management interface for Fiery servers
- Fiery Hot Folders 3
- Fiery Remote Scan 6

Fiery Command WorkStation 5.5

Command WorkStation enables your print operators to get more done than ever before. It centralizes job management, connects to all Fiery servers on the network and improves results in real time to increase productivity.

Version 5.5 comes with more great features, including:

- Drop zones, which combine the ease of use of Command WorkStation native drag and drop functionality with the power of the Fiery server's automated workflows. Operators get visual cues to apply a server preset or virtual printer to the job as it is imported into the Fiery server.
- Inline Editing of of server presets lets operators save time by applying workflow to a job within the job list, in addition to quickly changing the number of copies or renaming duplicate job names.
- Integration with Fiery Color Profiler Suite 4.x allows users to diagnose profile problems, compare gamuts, create and edit profiles without leaving Command WorkStation.
- Fiery Software Manager automatically checks and downloads updates to all of the Fiery Extended Applications in the background.

Fiery Hot Folders 3

Fiery Hot Folders automates document submission processes for efficient distributed print operations in production and office environments. Save time and reduce print errors by automating repetitive and redundant tasks with a simple drag-and-drop operation. A consistent user interface simplifies set up and management.

Fiery Remote Scan 6

The Fiery Remote Scan application allows you to control the Fiery scanner/document feeder configuration remotely from a client workstation. The TWAIN-compatible application runs on Windows and Macintosh clients and allows you to retrieve scans from your copier and save them to your computer or import them directly into compatible applications. Fiery Remote Scan can also automatically transfer scanned files from your Fiery mailbox to a mapped folder on your computer.

Fiery Ticker

Fiery Ticker is a visual application that acts like a screensaver and shows processing and printing speeds of the current job, the number of pages remaining for the current job, error messages, and tray information. It prominently displays error messages and allows the operator to monitor print production from a distance. Fiery Ticker provides great flexibility to the operator and boosts his productivity by providing a quick visual look at what the Fiery server is doing at any moment.

System Requirements

Fiery Server
The Fiery Extended Applications Package automatically installs all included applications on servers running Fiery System 9 and higher*. It supports Fiery Central version 2.x.

Client Stations
Connects to any Fiery System 8 Release 2 or higher system versions*.

Fiery Command WorkStation 5, Fiery Hot Folders, Fiery Remote Scan 6

Macintosh

- Multicore Intel® processor
- Mac OS X 10.6, 10.7 and 10.8
- 1 GB of RAM or more recommended
- 3 GB of available hard-drive space
- 1024x768 display with 16-bit video card

Windows

- Pentium 4, 1 GHz or faster processor
- Microsoft® Windows XP, Windows Vista® or Windows® 7, 8
- 1 GB of RAM or more recommended
- 3 GB of available hard-drive space
- 1024x768 display with 16-bit video card

Fiery JDF v 1.2.2
Fiery JDF v 1.2.2 is supported on any Fiery server running System 9 Release 2 or higher and includes great new features such as:

- Replaces Fiery server specific patches
- Automatically generates Device Capabilities
- Tighter integration with MIS systems
- Run-list editing

Optional Software Packages
- Fiery Impose
- Fiery Compose
- Fiery JobMaster
- Fiery JobFlow

Fiery Image Enhance Visual Editor

Macintosh

- Mac OS X 10.6, 10.7, 10.8
- Intel based processor
- 4 GB of RAM or more recommended
- 20 GB of available hard-drive space
- 1024x768 display with 16-bit video card
- Requires a Fiery Server System 9 or higher* with the Productivity Package for embedded Fiery servers or Graphic Arts Package for external Fiery servers

Windows

- Core2 Duo Processor
- 2 GB of RAM or more recommended
- 10 GB of available hard-drive space
- 1024x768 display with 16-bit video card
- Requires a Fiery Server System 9 or higher* with the Productivity Package for embedded Fiery servers or Graphic Arts Package for external Fiery servers

Fiery Hot Folders 3

Input formats

- PS, PDF, EPS, VDP

Output formats

- PS, PDF

Filters for Hot Folders

- Optional filters included in the Graphic Arts Package, Premium Edition: JPEG, Export PS, DCS2, CT/LW, PDF2Go, PDF/X Preflight
- Optional filters included in the Graphic Arts Package: TIFF-IT
- Standard Microsoft Office Filters: doc, docx, xls, xlsx, ppt, pps, pptx, ppsx, pub
