

PRODUCTION PRINTING SOLUTIONS

Fiery Extended Applications Productive. Powerful. Intuitive.

The Fiery® Extended Applications Package gives you complete functionality and control at your fingertips to manage, prepare and distribute your print and scan jobs from any Windows® and Mac® client for maximum productivity and outstanding results.

The Fiery Extended Applications Package gives you complete functionality and control at your fingertips. Now you can manage, prepare and distribute print and scan jobs from any Windows and Mac client for maximum productivity.

By installing the Fiery Extended Applications Package, you get the latest Fiery user software applications in one installation process, including:

- Fiery Command WorkStation® 5.3, the job management interface for Fiery servers
- Fiery Hot Folders 3
- Fiery Remote Scan
- Fiery Bridge for Windows

Fiery Command WorkStation 5.3

Command WorkStation enables your print operators to get more done than ever before. It centralizes job management, connects to all Fiery servers on the network and improves results in real time to increase productivity.

Version 5.3 comes with more great features, including:

- Fiery Image Enhance Visual Editor, an interactive plug-in for optimizing image appearance and output quality. Users can quickly adjust brightness, contrast, highlights, shadows, color balance and sharpness, plus correct red-eye on each image.
- A User-Defined Finish Size imposition workflow in Fiery SeeSequence Imposes reads and imposes jobs based on the trim values specified by the designer.
- Tighter integration with Fiery Color Profiler Suite, allowing the launch of the Profile, Inspect, and Edit modules without leaving the Command WorkStation user interface.
- User-interface enhancements increase productivity and ease of use.

Fiery Hot Folders 3

Fiery Hot Folders automates document submission processes for efficient distributed print operations in production and office environments. Save time and reduce print errors by automating repetitive and redundant tasks with a simple drag-and-drop operation. A consistent user interface simplifies set up and management.

Fiery Remote Scan

The Fiery Remote Scan application allows you to control the Fiery scanner/document feeder configuration remotely from a client workstation. The TWAIN-compatible application runs on Windows and Macintosh clients and allows you to initiate new scans and import them into compatible applications such as Adobe® Photoshop.

Fiery Bridge

Fiery Bridge offers a true scan-to-desktop workflow for distributing and sharing scanned documents. With push scanning capabilities, Fiery Bridge transfers scanned documents directly to a user's desktop from Fiery Mailboxes and provides connectivity to document-management and file-sharing systems. With seamless Windows integration, authenticated users can see and manage their mailbox at multiple Fiery servers* on the network.

System Requirements

Fiery Server

The Fiery Extended Applications Package automatically installs all included applications on servers running Fiery System 9 and higher*. On a server running Fiery System 6 to 8 Release 2, only Command WorkStation 5.3 will be installed.

Client Stations

Connects to any Fiery System 6 or higher system versions*.

Fiery Command WorkStation 5, Fiery Hot Folders, Fiery Bridge (Windows only), Fiery Remote Scan

Macintosh

- PowerPC® G5 or multicore Intel® processor
- Mac OS X v10.4, 10.5 or 10.6
- 1 GB of RAM or more recommended
- 3 GB of available hard-drive space
- 1024x768 display with 16-bit video card

Windows

- Pentium 4, 1 GHz or faster processor
- Microsoft® Windows XP, Windows Vista® or Windows® 7
- 1 GB of RAM or more recommended
- 3 GB of available hard-drive space
- 1024x768 display with 16-bit video card

Fiery Image Enhance Visual Editor

Macintosh

- Mac OS X 10.6
- Intel based processor
- 4 GB of RAM or more recommended
- 20 GB of available hard-drive space
- 1024x768 display with 16-bit video card
- Requires a Fiery Server System 9 or higher* with the Productivity Package for embedded Fiery servers or Graphic Arts Package for external Fiery servers

Windows

- Core2 Duo Processor
- 2 GB of RAM or more recommended
- 10 GB of available hard-drive space
- 1024x768 display with 16-bit video card
- Requires a Fiery Server System 9 or higher* with the Productivity Package for embedded Fiery servers or Graphic Arts Package for external Fiery servers

Fiery Hot Folders 3

Input formats

- PS, PDF, EPS, VDP

Output formats

- PS, PDF

Filters for Hot Folders

- Optional filters included in the Graphic Arts Package, Premium Edition: JPEG, Export PS, DCS2, CT/LW, PDF2Go, PDF/X Preflight
- Optional filters included in the Graphic Arts Package: TIFF-IT
- Standard Microsoft Office Filters: doc, docx, xls, xlsx, ppt, pps, pptx, ppsx, pub
