

What's New in Fiery VUE 1.1?

Green Printing Statistics

Found under the tools section, it allows users to track their paper savings as a direct result of using the green preferences including how many pages they have saved by day, week, month and year.

Windows® 7 Compatibility

Now compatible with Windows 7 32-bit and 64-bit, Windows XP 32-bit or Windows Vista® 32-bit.

Fiery VUE as a Print Driver

Users that choose to follow a traditional print workflow can use the Fiery VUE Print Driver as they would any other print driver. The Fiery VUE print driver allows users to print from any application. They are given the option to print directly to the Fiery-enabled printer, or they can open the print job in the Fiery VUE application.

Japanese Font Support

Fiery VUE now supports Microsoft® (MS) Office Kanji characters.

Manual Booklets

Users that do not have booklet finishing capabilities on their printer can use the Manual Booklet functions in Fiery VUE. Manual Booklets let the user print out the document as an imposed booklet without stapling, punch, etc. Once the document has printed, the user can fold, staple or punch the document manually.

Printer Profiles - "Save & Send"

Users that have loaded a Fiery VUE "Profile" instead of being connected directly to a Fiery-enabled printer can choose to "Save" their session based on the Fiery and printer configuration stored in the profile. The user can then send their saved session to the print facility that provided them with the Fiery VUE "Profile" and has the specific Fiery-enabled printer configuration for printing.

Mixed Paper Size Printing

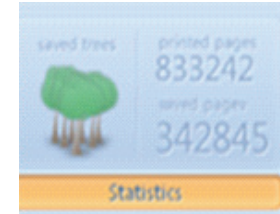

Users can now mix different paper sizes - letter & tabloid, letter & legal, A3 & A4 in the same Fiery VUE document.

Microsoft® Office® 2010

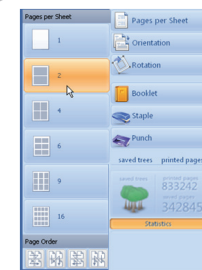

Fiery VUE is now compatible and fully integrated with Microsoft Office 2003, 2007 and 2010 to allow users to create Fiery VUE documents with multiple Microsoft Office versions.

Online Help

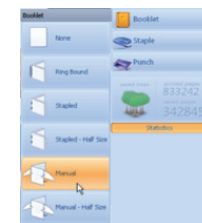

For added convenience, Fiery VUE help can now be found on the Fiery VUE website at www.efi.com.fieryvue/support.
