

Fiery VUE 1.2

Imagine More. Create More. Print More.

The Challenge

Enterprise and office environments are bringing document production to the desktop to lower costs and decrease turnaround times. Many documents in the office are customer-centric so workers want to produce professional, finished color documents, but don't have print workflow knowledge.

The Solution

Fiery® VUE from EFI™ is a “visual print application” that produces professional-looking, finished print materials quickly, easily and cost-effectively in-house. The interactive desktop application comes with a user-friendly 3D interface that visually guides you through document creation with intuitive layout and finishing tools. The environmentally-friendly solution also reduces your eco-footprint by reducing waste.

What's New in Fiery VUE 1.2?

Install Fiery VUE without Microsoft® Office®

Users now can install Fiery VUE without Microsoft® Office. Users can print PDF files from PDF viewer such as Adobe® Acrobat® following a traditional print workflow that can use the Fiery VUE Print Driver as they would any other print driver.

Enhanced Document Control

The enhanced document control features provide more user friendly and flexible document customization with intuitive 3D View.

Force Page-size of Single Sheet

Users now can force one page/multiple pages to be a specific page-size. When “Print on Both Sides” is on, Fiery VUE automatically inserts necessary blank page(s) to allow subsequent pages to be printed at the correct size.

Marquee Select in Thumbnail View

Users now can select multiple page thumbnails at once with just one mouse click and drag.

Interactive User Selection of “Print on Both Sides”

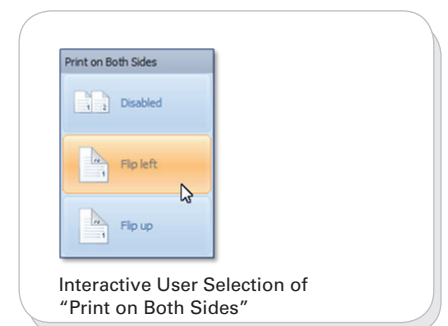

Gives users more flexibility and intuitive 3D view for double-sided printing. Users now can select disable Print on Both Sides, Flip Page Left or Flip Page Up. Users without a booklet finisher can take advantage of Fiery VUE and their printouts are ready for off-line stapling/binding.

Simplified Chinese Font Support

Chinese Font is now supported for Fiery VUE printing in addition to existing Japanese font support.

More Fiery VUE Certified Printers

Fiery VUE now supports more than 180 printer models. To check if your printers are certified, please check Fiery VUE Certified Printers page at www.efi.com/fieryvue/certifiedprinters

Fiery VUE 1.2

Imagine More. Create More. Print More.

Office Users can:

- ✓ Simplify printing and publishing tasks with direct one-button access from Microsoft Office applications.
- ✓ Save time and money with desktop document control to produce customized, professionally-looking and finished material in a fraction of the time and cost.
- ✓ Reduce waste with the interactive 3D preview mode and the Green Books auto-templates for booklets.

Business Owners can:

- ✓ Increase ROI and lower overhead cost by eliminating the need for third-party expenditures, reducing training and staffing and decreasing waste.
- ✓ Reduce paper usage by up to 85% with Green Books, automatic layout templates that are included in the Fiery VUE.
- ✓ Improve productivity and quality by eliminating waiting and tracking time of outsourced materials and ensures corporate brand integrity by producing consistent output of corporate colors.
- ✓ Deploy a silent push enterprise installation and updates of Fiery VUE with system management server and track eco-savings with Green Printing Statistics by day, week month and even a year.
