The easiest way to access, pay and print.

The EFI™ M500 Station lets you copy or print from USB drives, mobile devices or cloud accounts, and pay in a completely self-serve environment.

**Cloud and mobile printing**

In addition to copying, the M500 station enables printing in a number of ways:

- Print from USB — connect the USB drive to the front-facing port.
- Print from Mobile Devices — email files to print@printme.com to receive a unique document ID or barcode. Scan (with M505) or enter that code when ready to print.
- Print from Cloud Accounts — access popular cloud services such as Dropbox, Box, Google Drive™, Microsoft OneDrive and PrintMe.

**Easy, tablet-like customer experience**

The M500 station boasts a bright 10” color touch screen that makes it easy to preview files before printing, choose finishing options and pay with cash card, credit card or campus card. It supports intuitive touch gestures that make zooming, scrolling and selecting incredibly easy.

**A flexible platform for growth**

The M500 station works with many MFPs. Its flexibility to add new features and services as your customer needs change provides an incredible platform for growth and greatly expands the life of the hardware investment.
EFI M500 Station

**Security**
- Hardened image
- Encrypted communications
