Student print needs have changed. How do you stay current?
Perfect for today’s campus and library.

Students today are more digital and more mobile and keep more documents in the cloud. Antiquated devices such as coin-operated copiers are not meeting their printing needs and create cash management headaches for university staff. Isn’t it time for a better solution?

EFI Self-Serve and Payment Systems simplify the access and payment processes and provide the flexibility to print from mobile devices and popular cloud storage accounts.

Do you need self-serve copy and print with access to the cloud?

The EFI M500 Self-Serve Copy and Print Station provides the easiest way for users to access, print and pay in a completely self-serve environment, whether accessing files from their USB drives, mobile devices or cloud accounts. The M500 station boasts a large 10” color touch screen, provides secure encrypted communication and integrates with campus card and billing systems. The M500 station:

- Prints from USB drives and mobile devices
- Prints from cloud accounts such as Dropbox, Google Drive®, Microsoft OneDrive, Box and PrintMe®
- Supports major credit cards, cash cards and integrates into campus card payment systems
- Is compatible with PostScript® Multi-Function Printers (MFP)
How are you handling printing from mobile devices?

Tablets, mobile phones and laptops are the new tools for students. EFI PrintMe enables these devices to print documents, photos and projects to existing Multi-Function Printers (MFP). Students send documents through the PrintMe cloud and receive a release code back; then they access the documents by typing or scanning the code into the M500 station. PrintMe:

- Is included at no cost with the M500 station
- Works with any mobile device with email (print@printme.com)
- Has driver for PC and Mac
- Has a mobile app for iOS and Android devices to upload files and receive release codes

Need to accept cash for copy and print?

The EFI G5 Card Vending Kiosk provides students with convenient self-serve access to purchase and reload cash cards and receipt printing. The Card Vending Kiosk:

- Includes 19” capacitive touch screen
- Offers high-speed thermal receipt printing
- Holds up to 200 cards
- Provides multi-directional, multi-currency bill acceptor for up to 600 bills
- Offers optional multi-currency coin acceptor
Do you already have counter staff?

If you have counter staff or need to allow for adjustment to transactions, EFI EP Register is a simple solution. It allows your employees to check card balances, apply discounts, monitor connected devices and print receipts. With the included card reader, staff can also activate and add value to cash cards. EP Register:

- Allows staff to add value to cards and provide transaction adjustments
- Provides feedback about connected devices so staff can troubleshoot
- Runs on a stand-alone PC or integrates with existing Windows-based systems

What application ties it all together?

The EFI Self-Serve Copy and Print solution requires one of two back-end systems that manage and configure the EFI Self-Serve devices. AdminCentral, the cloud-based service, allows administrators to manage the M500 stations from anywhere — using just a web browser. The EP Server software hosted on-site manages the M500 stations as well as the optional G5 Kiosk and EP Register. The management application does the following:

- Allows addition and configuration of devices and print services, including cloud storage and file transfer services
- Sets or adjusts prices and tax rates for multiple connected devices
- Generates detailed device usage reports
- Monitors device status in real time and provides diagnostics through dashboards
- Notifies of software updates and pushes to multiple connected devices
- Provides integration with campus ID card payment systems

Self-Serve AdminCentral manages all of the M500 stations in multiple locations from a browser and monitors device status in real time.

EFI fuels success.

From Fiery to superwide inkjet, from the lowest cost per label to the most automated business processes, EFI has everything your company needs to succeed. Visit www.efi.com or call 650-357-3500 for more information.
