EFI Pace Mobile Web Application

Stay in Touch with Real-time Management Information from Anywhere.

Don’t let physically being away from the office keep you from accessing your EFI Pace MIS system. With the EFI Pace Mobile Web Application, you can stay informed and active while on the move. Even improve your customer service by positioning yourself to address your customers’ questions while on site at their locations.

The EFI Pace Mobile Web Application enables you to access information in EFI Pace from your mobile device, including Android, Blackberry and Apple devices, so your company doesn’t miss a beat. Today, decision makers are on the road more than ever and the information accessible from your phone makes this module a must for those constantly traveling, working from home or visiting customers.

**CRM**
View existing campaign information as well as opportunities and activities to effectively manage your schedule. Leverage the Geo Locate feature to identify contacts that are within range of your current location so that you never miss an opportunity for face to face time. Locate and view open activities, opportunities and campaigns.

**Accounting/Estimating**
View detailed customer information such as account balances and existing invoices and obtain accurate contact information to expedite customer communications. View existing estimates to familiarize yourself with details of specific quotes and even create detailed estimates and obtain immediate pricing to expedite the sales process.

**Production**
View up-to-the-minute production information such as current locations, job notes, actual costs and planned activities. You can view detailed shipment information and even track cartons within a shipment. Even view production data for cost centers, including job plans and transactions.

**Data Collection**
Conduct standard Data Collection activities, like starting job activities from your mobile device. Enter real-time labor transactions against any open job just as if you were using a data collection keypad or a terminal on the production floor.

The application’s simple user interface makes it easy for you to find exactly what you are looking for. Stay informed and active from anywhere with minimal effort or training.
EFI Pace Mobile Web Application

Inventory
View real time inventory levels for customer supplied stock, finished goods or any raw material. For those involved with the production process, perform real-time transactions to receive, pull, charge jobs, enter physical counts or transfer items from one location to another. Wireless barcode scanners can be connected to the Pace system for inventory and data collection use.

Planning
View current loads for any cost center that is being scheduled to help sell/price more work based on customers required delivery dates.
