Simplify inventory control and accuracy.

Take the guesswork out of inventory control and movement by quickly and easily scanning inventory with wireless radio-frequency scanners.

*Simplify Your Processes at the Receiving Dock*

Beginning at the receiving dock, EFI Radius helps manage the verification of goods when they are received, so you can track what came in against purchase orders, before items go into stock. On receipt from the supplier, the system produces bar-coded labels to attach to pallets, cases or rolls to allow for tracking of all further movements. Supplier information can be received via optional EDI, allowing for the use of supplier-applied barcodes.

*Automate the Movement, Tracking and Picking of Products*

Handheld Device Support allows materials to easily be placed where they need to be accessed, whether or not they are already allocated to jobs or are considered free stock. Whether moving raw materials or finished goods or keeping track of inventory, EFI Radius Handheld Device Support makes it quick and easy. It lets you interface directly with the EFI Radius database for rapid, systematic inventory management. It also automatically generates picking lists using radio-frequency hand held terminals.
Wireless Barcoding

**Recommendations**

The EFI Radius application for handheld barcode scanners is written for equipment with a 16 lines x 24 characters display.

Scanners that offer 16 lines x 20 character displays generally work fine, but require additional scrolling. For ease of use, 16 x 24 is highly recommended.

- Handheld scanners with full alphanumeric keypads are recommended.
- Handheld scanners with combination keys can be used, however a full keyboard is recommended for rapid entry.
- Devices are used as a telnet terminal to run handheld software; Windows CE or Mobile are not required.
- Handheld menus are fully customizable.

---

**EFI fuels success.**

From Fiery to superwide inkjet, from the lowest cost per label to the most automated business processes, EFI has everything your company needs to succeed. Visit www.efi.com or call 800-875-7117 for more information.
