Co-branded EFI™ and 3M™ UV inks are optimized for 3M graphic media on the following printers:

- EFI VUTEk® PV200 (2200 UV Series).
  Note: This legacy printer is no longer sold.
- EFI VUTEk QS220 (2820 UV Series).
- EFI VUTEk QS2000 (2800 UV Series).
- EFI VUTEk QS3220 (2800 UV Series).
- EFI VUTEk GS5000r (GSr 3M Premium Inks).

The combination of these industry-leading printers and inks meet most businesses' large-format needs because these solutions are designed for a wide range of opaque, clear and translucent 3M media. The flexible inks are ideal for graphics on curved, corrugated or flat surfaces with or without rivet applications. Typical applications for these printers and inks include:

- Fleet and vehicle graphics.
- Point-of-Purchase.
- Signage.
- Banners.
- Out-of-home advertising.
- Exhibits.

These UV-cured inks produce vibrant four-or six-color graphics, are durable and weather resistant, have excellent color retention and eliminate the need for solvent drying.

The co-branded EFI and 3M inks qualify for the 3M™ MCS™ Warranty if the output is printed on 3M flexible media. The inks are available in:

- CMYK.
- Light Magenta.
- Light Cyan.
- White (2800 UV Series only).

Note: VUTEk is announcing new inks that qualify for the 3M MCS Warranty on finished graphics printed with the GS5000r on 3M flexible media. This warranty will begin with shipments of the GSr 3M Premium inks in Q1 2011. The 3M MCS Warranty lasts up to five years using the new co-branded EFI inks that have a shelf life of 15 months.
